

AVRAHAM STATO

Junior Software Engineer | Full Stack | AI & Systems Automation
statto3@gmail.com | 054-887-2039 | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

SUMMARY

Junior Software Engineer with hands-on experience in full-stack development, AI integration, and intelligent automation systems. Built production-grade tools using React, Next.js, Node.js, NestJS, and Python. Proficient with AI-powered IDEs (Cursor, Claude Code, Antigravity) and cloud platforms (GCP, AWS). Delivered government-scale deployments with zero downtime. Fast learner who turns real operational problems into automated solutions.

SKILLS

Languages: JavaScript (ES6+), TypeScript, Python, Java

Frontend: React.js, Next.js (App Router), HTML5, CSS3, Tailwind, Bootstrap, Framer Motion, Radix UI

Backend & DB: Node.js (Express.js), NestJS, FastAPI, Prisma, PostgreSQL, MongoDB, SQL, REST APIs, JWT Auth

Cloud & DevOps: GCP, AWS, Docker, Docker Compose, GitHub Actions, npm Workspaces, Linux

AI & Automation: OpenAI, Gemini, LiveKit, Cursor, Claude Code, Make, n8n, PowerShell, Bash

PROJECTS

Interview Avatar AI (Python, FastAPI, TypeScript, React, LiveKit, GPT-4o) | [GitHub ↗](#)

- End-to-end AI recruitment platform with real-time voice & vision interaction under 500ms latency.
- Zero-latency CV context injection pipeline + GPT-4o Vision for live non-verbal cue feedback.

Solar Intelligence Platform (Next.js, NestJS, FastAPI, PostgreSQL/Prisma, Docker, OpenAI) | [GitHub ↗](#)

- Full-stack monorepo (web/api/engine) — Next.js dashboard, NestJS REST API with JWT auth, FastAPI deterministic analytics engine.
- Integrated real solar/weather/geo providers (PVGIS, Open-Meteo, OpenWeather, OpenCage) with provider abstractions and fallbacks.
- Deterministic scoring engine (forecasts, risk analysis, ROI estimates) with optional OpenAI-powered natural-language summaries.

Exam Scanner & Management System (Python, Node.js, PostgreSQL, Google Document AI, OCR)

- Smart workstation monitoring (operational/faulty), inventory tracking (warehouse vs. field), automatic hardware-to-exam assignment.
- OCR + Google Document AI pipeline for fully automated data extraction; QR/barcode scanning for instant candidate ID.

EDUCATION

Software Engineering Diploma | Ort Singalovski College | 2022–2025 | Grade: 90

Algorithms, Data Structures, Full-Stack Development, Java, JavaScript, Python

WORK EXPERIENCE

Software Engineer & Automation Developer | One Taldor | 2018 – Present

- Independently developed internal software tools deployed in production across government exam sites — including automation scripts (Python, PowerShell, CMD, SQL) and the Exam Scanner & Management System — in addition to core IT operations responsibilities.
- Built automation pipelines that enabled full configuration of 2,700 exam workstations from scratch in under 10 days — 30% faster than manual process, with zero errors across 3 government ministries (Health, Education, MAHAT).
- Deployed and maintained computerized exam infrastructure on the Sonnet and TAO platforms — ensuring 100% operational readiness for nationwide OECD assessments (PISA, TIMSS, PIRLS, TALIS) with zero downtime.
- Applied hands-on field experience to independently design and build the Exam Scanner system — solving real inventory, monitoring, and data extraction problems I encountered daily in production environments.

Store Manager | Ivory Computers | 2017 – 2018

- Custom PC builds, technical consulting, and growing repeat sales through personalized service.
