

AVRAHAM STATO

Software Engineer | Full Stack | AI & Systems Automation
statto3@gmail.com | 054-887-2039 | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

SUMMARY

Results-driven Software Engineer combining a recently completed Software Engineering diploma with extensive hands-on production experience. Evolved from managing government-scale IT infrastructure to architecting and developing the automated pipelines and full-stack tools (React, Node.js, Python) that run them. Proficient with AI-powered IDEs (Cursor, Claude Code) and cloud platforms (GCP, AWS). Proven ability to build AI-driven applications and complex backend systems, turning operational bottlenecks into scalable software solutions.

SKILLS

Languages: JavaScript (ES6+), TypeScript, Python, Java

Frontend: React.js, Next.js, HTML5/CSS3, Tailwind CSS

Backend & Databases: Node.js, NestJS, FastAPI, PostgreSQL, MongoDB, Prisma ORM, RESTful APIs

Cloud & DevOps: AWS, GCP, Docker, GitHub Actions (CI/CD), Linux

AI & Scripting: OpenAI API, Gemini API, LiveKit, Bash, PowerShell, AI-Assisted Dev (Cursor, Claude Code by Anthropic)

Automation Tools: Make (Integromat), n8n, Zapier

WORK EXPERIENCE

Software Developer & Automation Engineer | One Taldor | 2018 – Present (Role evolved from IT Operations to Software Development)

- **Full-Stack Development:** Architected and independently developed internal software solutions, including the Exam Scanner System (Node.js, React, Python, Google Document AI) — digitizing manual inventory tracking and operational workflows across nationwide production environments.
- **Systems Automation:** Engineered automation pipelines (Python, PowerShell, CMD, SQL) enabling full configuration of 2,700 exam workstations from scratch in under 10 days — 30% faster than manual process, zero errors across 3 government ministries.
- **IT Infrastructure:** Maintained computerized exam infrastructure (Sonnet and TAO platforms) for government ministries, ensuring 100% operational readiness for OECD assessments (PISA, TIMSS, PIRLS, TALIS) with zero downtime.

Store Manager | Ivory Computers | 2017 – 2018

- Led store operations focusing on custom PC builds, technical consulting, and growing repeat sales through personalized service.

SELECTED PROJECTS

Interview Avatar AI (Python, FastAPI, TypeScript, React, LiveKit, GPT-4o) | [GitHub ↗](#)

- End-to-end AI recruitment platform with real-time voice & vision interaction under 500ms latency.
- Zero-latency CV context injection pipeline + GPT-4o Vision for live non-verbal cue feedback during interviews.

Solar Intelligence Platform (Next.js, NestJS, FastAPI, PostgreSQL/Prisma, Docker, OpenAI) | [GitHub ↗](#)

- Full-stack monorepo (web/api/engine) — Next.js dashboard, NestJS REST API with JWT auth, FastAPI deterministic analytics engine.
- Integrated solar/weather/geo providers (PVGIS, Open-Meteo, OpenWeather, OpenCage) with provider abstractions and OpenAI-powered natural-language summaries.

Exam Scanner & Management System (Node.js, React, PostgreSQL, Google Document AI, OCR — Delivered to production at One Taldor)

- Smart workstation monitoring (operational/faulty), field-vs-warehouse inventory tracking, automatic hardware-to-exam assignment.
- OCR + Google Document AI pipeline for fully automated data extraction; QR/barcode scanning for instant candidate identification.

EDUCATION

Software Engineering Diploma | Ort Singalovski College | 2022–2025 | Grade: 90

Algorithms, Data Structures, OOP, Full-Stack Development, Java, JavaScript, Python
